See my video of proof here: UPDATE(10-4-14): Comments and ratings have been disabled due to negativity! I guess people just doesn't know how to read and follow instructions correctly! People that messed up their computer doing this must have did something wrong because I downloaded this TWICE(Unistalled and then reinstalled) and my PC works fine! If people would know how to read, I have posted a video of proof showing that(Link above!) I do admit that I made ONE small mistake in this tutorial and that is to click 'Custom' instead of express! Clicking 'Express' does download additional software, but still NO VIRUS!!&thats why I posted a video of proof above, TO SHOW YOU THE ENTIRE PROCESS!!Photo Booth is a photo taking application which comes pre-installed with Mac OS X and iPad 2.. These drivers have been tested and found to be issue free by Imaging Spectrum's tech department.
