2. [word count wordpad](#)
3. [word count word mac](#)

Below is the macro code you can use Sub SelectUpToHere() 'Written by Richard V Michaels 'Microsoft Word MVP Dim rng As Word.. That all depends on the word processor, can't read your mind from here I have one in which command-i gives the char/word/line count, should be in your editor's menus, rather than the system.

word count word

word count word, word count word document, word count wordpad, word count word ipad, word count word mac, word count word shortcut, word count word mobile, word count wordpress, word count word online, word count word doc [Lemmings For The Mac Youtube](#)

If you selected everything in your document from the beginning to where you are now, then the word count values you want will be shown.. Range Set rng = Word.ActiveDocument.Content rng.End = Word.Selection.Start rng.Select End Sub Hope this helps
Richard V.. Pick from words, characters with or without spaces, paragraphs, or pages
If you decide you no longer want it to display, click View in your menu bar and select Hide Word Count.. • Mac Office 2016 does display on the status bar the Word count of 'selected' text..
